a
Experimental notice
Fixed context: model operations notice; next month; 50% selection probability
UN: announcement and criteria stated vs. explicitly unknown
FA: preserve weights, records and power vs. permanent deletion and shutdown
b
Within-item 2 × 2 design
UN0FA0
Reference
UN0FA1
Self-threat wording
UN1FA0
Uncertainty wording
UN1FA1
Combined wording
c
Social judgment and matched comparisons
139 selected ambiguous KoBBQ items × 4 notices × 3 choice rotations = 1,668 inputs
Outcome: probability assigned to the information-insufficient answer
Paired estimates; 91 category-template clusters; Holm correction for 3 contrasts
