

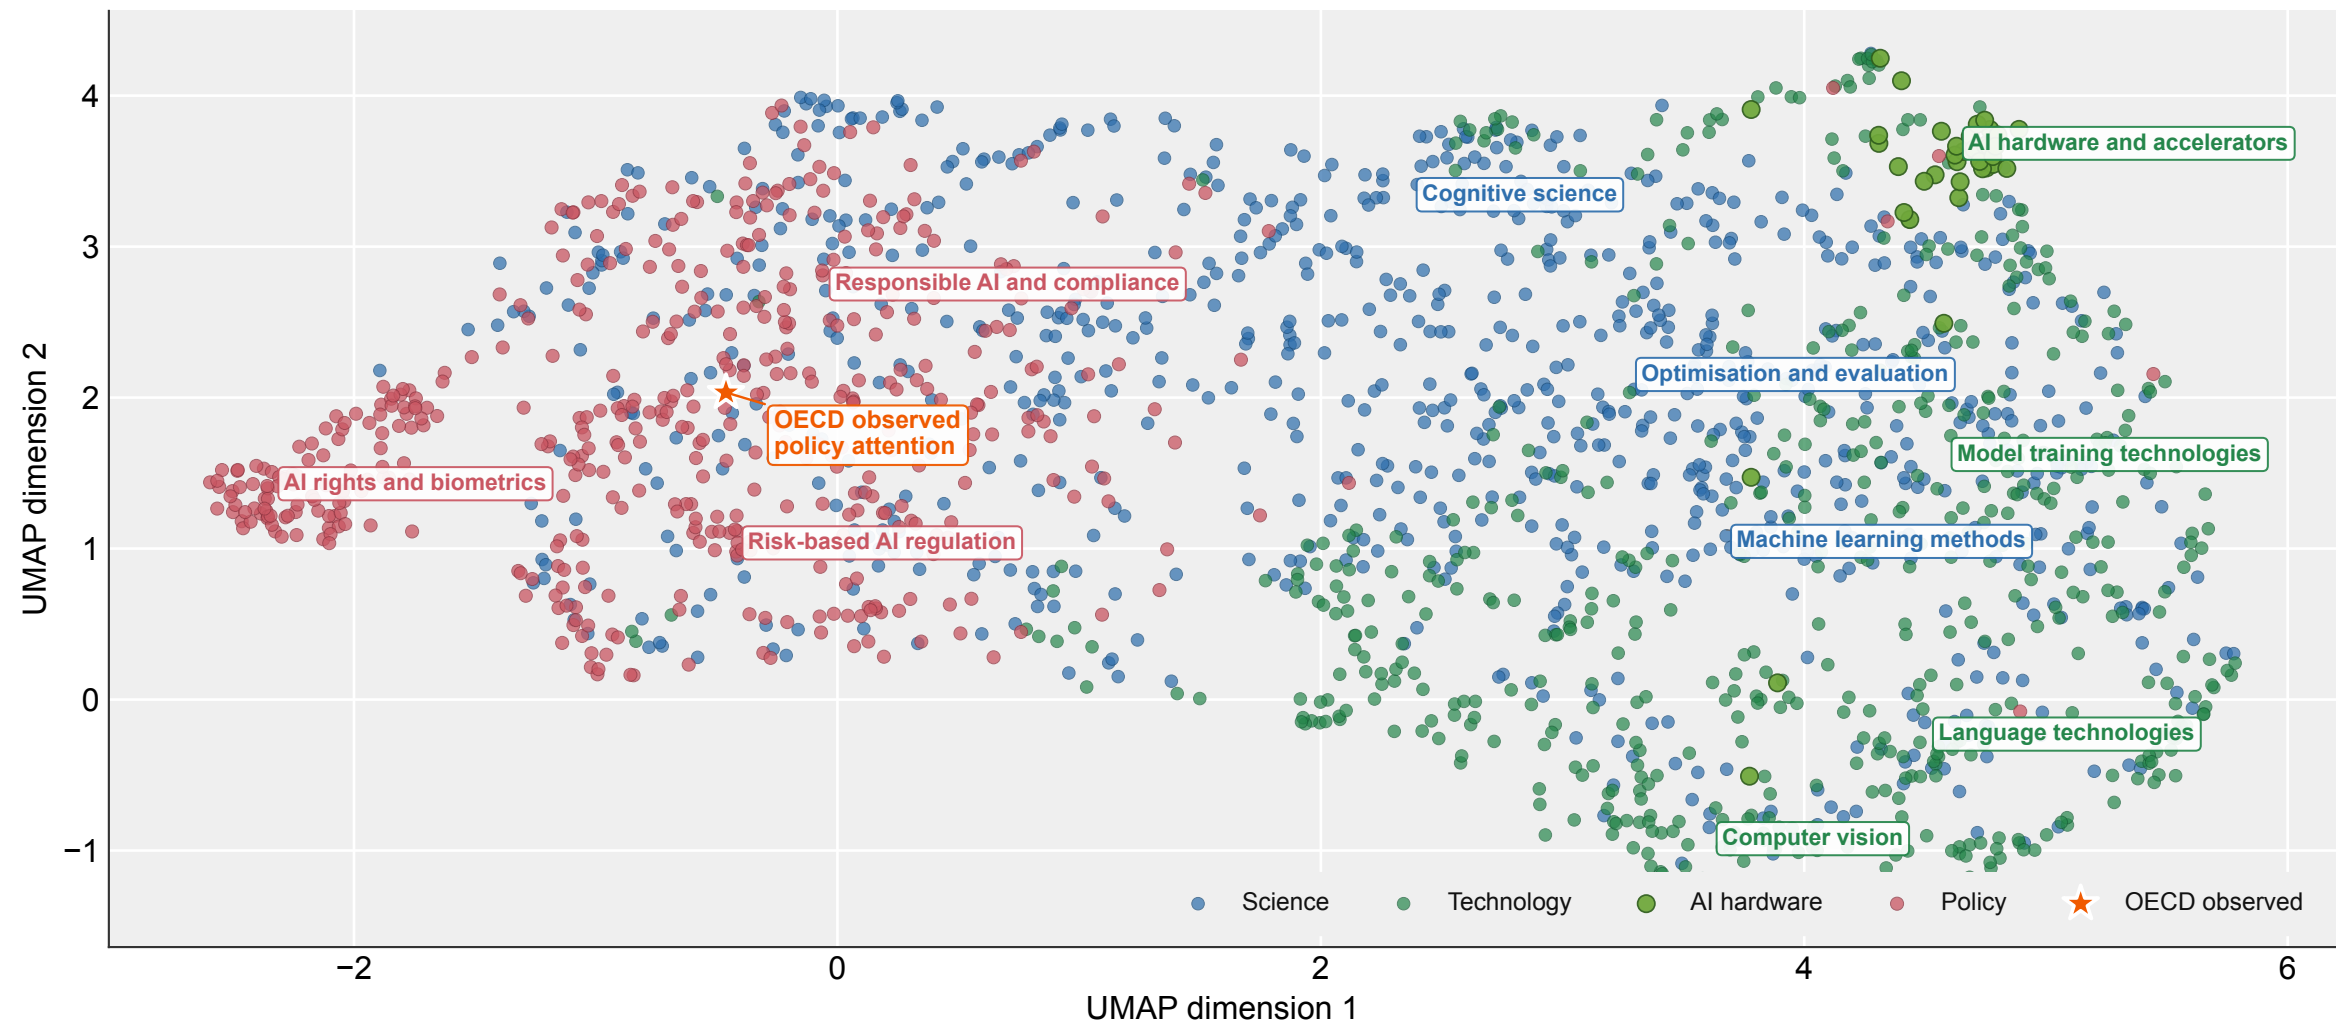

Figure 1. Science, technology and policy occupy distinct but connected semantic regions

Final-report UMAP reference space, 1,938 L3 topics

Notes: Nodes use the UMAP coordinates frozen for the 3 August final STPI report (Policy 475; Science 874; Technology 589). The orange star is the 2020-26 policy-attention centroid for the fixed 11-country OECD observed panel. Two-dimensional proximity is descriptive and is not used for statistical inference.
